

Choose your master secret.

You will only need to memorize one secret. All your passwords will be produced from this secret, so make up something hard to guess, write it down, and keep it in a safe place. For a better secret, avoid normal words and mix letters, numbers, and symbols.

Choose your master secret: good (31 bits)

Betty the Goldfish is strengthening your secret. The longer you wait, the stronger it will get.

Betty estimates that it would take **1.7 years** for an attacker to guess your secret using a typical \$1000 computer made in 2006.

When you are happy with the strength of your secret, enter it again below and click OK.

Confirm your master secret: confirmed!
